Oil	-barrels per day	7,157	7,949	7,328	8,242
	-average price (\$ per barrel)	65.49	77.20	67.33	73.93
NGLs	-barrels per day	1,009	1,070	976	985
	-average price (\$ per barrel)	22.45	43.95	26.34	42.28
Natural gas	- MCF per day	23,820	24,144	23,836	24,719
	- average price (\$ per MCF)	0.96	1.37	1.58	1.58
Total barrels of oil equivalent per day (BOE) ⁽²⁾		12,136	13,043	12,277	13,347

⁽¹⁾ Funds flow is not a recognized measure under IFRS. For these purposes, the Company defines funds flow as funds provided by operations including investment income received excluding the effects of changes in non-cash working capital items and decommissioning expenditures settled.

⁽²⁾ BOE may be misleading, particularly if used in isolation. A BOE conversion ratio of 6 MCF: 1 bbl is based on an energy conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead.

REPORT TO SHAREHOLDERS

Bonterra Energy Corp. (“Bonterra” or the “Company”) is pleased to report operating and financial results as at and for the three and nine months ended September 30, 2019. Bonterra has benefitted to date in 2019 from narrowing differentials on Canadian sweet crude oil due to mandatory production curtailments instituted by the Government of Alberta. The impact of this curtailment enabled the Company to realize improved prices for the first nine months of 2019 relative to the extremely weak prices experienced through the latter part of 2018. Despite the narrowing differentials, volatility in commodity markets continues to challenge the industry.

In the first nine months of 2019, Bonterra has remained committed to balancing its debt reduction strategy with the development of its high-quality, light oil-weighted assets concentrated in Alberta’s Pembina and Willesden Green Cardium areas. As a result of the Company’s low annual production decline rate of approximately 20 percent, the maintenance capital requirements on Bonterra’s asset base remain relatively low, enabling funds flow to be directed to a combination of capital expenditures, debt reduction and dividend sustainability. At September 30, 2019, the Company successfully reduced net debt by \$20.8 million compared to December 31, 2018, a meaningful six percent decrease. Continuing to strengthen the balance sheet remains an important factor in Bonterra’s plan and will allow for future capital to be shifted towards growth opportunities, acquisitions, or dividend enhancements.

Following are highlights from the Company’s third quarter and first nine months of 2019:

- Reduced net debt at September 30, 2019 by six percent, or \$20.8 million, to \$308.1 million compared to \$328.9 million at December 31, 2018, which improves Bonterra’s financial flexibility and enhances long-term sustainability.
- Generated funds flow of \$22.6 million (\$0.68 per share) in Q3 2019, and \$73.2 million (\$2.19 per share) for the nine months ended September 30, 2019, which was used to fund Bonterra’s capital program, support meaningful debt repayment and to fund the monthly dividend.
- Invested approximately \$41.4 million in capital expenditures year-to-date in 2019 to drill 26 gross (20.6 net) wells, complete 26 gross (20.6 net) wells and tie-in 24 gross (18.6 net) wells. An additional \$6.5 million was directed to related infrastructure costs, recompletions and other capital expenditures for total net capital expenditures of \$47.9 million in the nine-month period.
- Averaged 12,136 BOE per day of production in Q3 2019 and 12,277 BOE per day for the first nine months of the year, reflecting modest capital spending in 2019 coupled with the impact of voluntary shut-in volumes of approximately 440 BOE per day in the nine-month period due to low commodity prices.
- Recorded net earnings of \$23.3 million (\$0.70 per share) in the first nine months of 2019, an increase of 28.7 percent, or \$5.2 million over the same period in 2018, resulting primarily from a deferred income tax recovery related to the decrease in Alberta’s corporate income tax rate. Lower production and weaker oil prices in Q3 2019 led to a net loss of \$1.3 million in the quarter.
- Recorded field netbacks of \$24.30 per BOE in Q3 2019 and \$26.82 per BOE in the nine months ended September 30, 2019, reflecting volatility in pricing.
- Declared and paid out \$0.03 per share in cash dividends to shareholders in the third quarter, resulting in \$0.09 per share in cash dividends for the nine months ended September 30, 2019, and a payout ratio based on cash flow from operations of five percent.

The Company will continue to regularly monitor the commodity price environment, and changes to funds flow, with the primary objective of ensuring a prudent capital program, a sustainable dividend and continued debt reduction.

Effective October 31, 2019, following a semi-annual review, the Company’s borrowing base was adjusted to \$325 million from \$340 million. With a \$20.8 million decrease in net debt year to date, and strategies in place for further debt reduction, Bonterra retains appropriate liquidity and financial flexibility to continue executing on its business plan. The revised borrowing base is comprised of a \$287 million syndicated revolving credit facility, and a \$38 million

non-syndicated revolving credit facility, with an accordion feature allowing the Company to obtain future funding of up to \$40 million for opportunities outside of normal operations, such as acquisitions.

Outlook

With the completion of facility maintenance turnarounds during Q3 2019, Bonterra's current production is now approximately 12,750 BOE per day, and production costs in Q4 2019 are expected to be below the nine-month average of \$15.03 per BOE. Year-to-date average annual production for 2019 is anticipated to be approximately two percent lower than the original guidance range of 12,600 to 13,200 BOE per day. Full year capital expenditures are expected to be near the low end of the Company's original 2019 budget of \$57 to \$77 million, with an incremental \$6 to \$7 million anticipated to be directed to drilling in Q4 2019.

To navigate through commodity price volatility, the Company has entered into physical delivery sales and risk management contracts to realize average Edmonton Par prices on 2,500 barrels per day of crude oil for the month of October and 3,500 barrels per day of crude oil for November and December of 2019. The average realized Edmonton Par prices the Company will receive on these contracts will range between C\$62.90 and C\$68.69 per bbl, adding to revenue generation stability. Financial discipline, cost control, and long-term sustainability continue to be priorities for Bonterra into Q4 and to set the stage for 2020. The Company's focus will remain on reducing net debt, reinforcing the balance sheet, executing a responsible capital program and supporting the dividend. The capital program will continue to focus on opportunities offering optimal sustainability with the highest returns and greatest value-generating potential.

Thank you again for your continued support.

George F. Fink
Chief Executive Officer and Chairman of the Board

MANAGEMENT'S DISCUSSION AND ANALYSIS

The following report dated November 6, 2019 is a review of the operations and current financial position for the three and nine months ended September 30, 2019 for Bonterra Energy Corp. ("Bonterra" or "the Company") and should be read in conjunction with the unaudited condensed financial statements and the audited financial statements including the notes related thereto for the fiscal year ended December 31, 2018 presented under International Financial Reporting Standards (IFRS).

Use of Non-IFRS Financial Measures

Throughout this Management's Discussion and Analysis ("MD&A") the Company uses the terms "payout ratio", "cash netback" and "net debt" to analyze operating performance, which are not standardized measures recognized under International Financial Reporting Standards ("IFRS") and do not have a standardized meaning prescribed by IFRS. These measures are commonly used in the oil and gas industry and are considered informative by management, shareholders and analysts. These measures may differ from those made by other companies and accordingly may not be comparable to such measures as reported by other companies.

The Company calculates payout ratio percentage by dividing cash dividends paid to shareholders by cash flow from operating activities, both of which are measures prescribed by IFRS which appear on our statement of cash flows. We calculate cash netback by dividing various financial statement items as determined by IFRS by total production for the period on a barrel of oil equivalent basis. The Company calculates net debt as long-term debt plus working capital deficiency (current liabilities less current assets).

Frequently Recurring Terms

Bonterra uses the following frequently recurring terms in this MD&A: "WTI" refers to West Texas Intermediate, a grade of light sweet crude oil used as benchmark pricing in the United States; "MSW Stream Index" or "Edmonton Par" refers to the mixed sweet blend that is the benchmark price for conventionally produced light sweet crude oil in Western Canada; "AECO" refers to Alberta Energy Company, a grade or heating content of natural gas used as benchmark pricing in Alberta, Canada; "bbl" refers to barrel; "NGL" refers to Natural gas liquids; "MCF" refers to thousand cubic feet; "MMBTU" refers to million British Thermal Units; "GJ" refers to gigajoule; and "BOE" refers to barrels of oil equivalent. Disclosure provided herein in respect of a BOE may be misleading, particularly if used in isolation. A BOE conversion ratio of 6 MCF: 1 bbl is based on an energy conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead.

Numerical Amounts

The reporting and the functional currency of the Company is the Canadian dollar.

⁽¹⁾ Q4 2017 includes the disposition of a two percent overriding royalty interest on the total production from the Company's Pembina Cardium pool that closed December 20, 2017 and was effective January 1, 2018. Consideration consisted of \$52 million of cash and incremental Cardium assets valued at \$4.7 million which is included in capital expenditures (refer to Note 5 of the December 31, 2017 audited annual financial statements).

Business Environment and Sensitivities

Bonterra's financial results are significantly influenced by fluctuations in commodity prices, including price differentials, as well as production volumes and foreign exchange rates. The following table depicts selective market benchmark commodity prices, differentials and foreign exchange rates in the last eight quarters to assist in understanding how past volatility has impacted Bonterra's financial and operating performance. The increases or decreases for Bonterra's realized average price for oil and natural gas for each of the eight quarters is also outlined in detail in the following table.

	Q3-2019	Q2-2019	Q1-2019	Q4-2018	Q3-2018	Q2-2018	Q1-2018	Q4-2017
Crude oil								
WTI (U.S.\$/bbl)	56.45	59.81	54.90	58.81	69.50	67.88	62.87	55.40
WTI to MSW Stream Index								
Differential (U.S.\$/bbl) ⁽¹⁾	(4.66)	(4.62)	(4.85)	(26.30)	(6.83)	(5.45)	(5.89)	(1.14)
Foreign exchange								
U.S.\$ to Cdn\$	1.3207	1.3375	1.3293	1.3215	1.3070	1.2911	1.2651	1.2717
Bonterra average realized								
oil price (Cdn\$/bbl)	65.49	71.27	64.87	38.96	77.20	76.51	67.78	65.16
Natural gas								
AECO (Cdn\$/mcf)	0.91	1.03	2.61	1.55	1.19	1.18	2.07	1.68
Bonterra average realized								
gas price (Cdn\$/mcf)	0.96	1.09	2.70	1.77	1.37	1.16	2.24	1.90

⁽¹⁾ This differential accounts for the majority of the difference between WTI and Bonterra's average realized price (before quality adjustments and foreign exchange).

The overall volatility in Bonterra's average realized commodity prices can be impacted by numerous events or factors, including but not limited to:

- Worldwide (particularly North American) crude oil supply and demand imbalance;
- Geo-political events that affect worldwide crude oil supply and demand;
- The value of the Canadian dollar compared to the US dollar;
- Access to infrastructure and markets;
- Crude oil curtailments;
- Weather; and
- Timing and duration of plant, refinery and pipeline maintenance.

Volatility in WTI benchmark pricing has continued through the third quarter of 2019. Uncertainties around both global supply and demand have contributed to the crude oil price volatility, as well as heightened geopolitical concerns stemming from an attack on Saudi Arabia's largest crude processing facility. Concern about weak demand in the 2nd half of 2019 and continuing into 2020, comes from a variety of factors, including but not limited to global trade issues between the US and China. With respect to supply, there is uncertainty whether crude oil supply growth, such as the shale oil growth in the US, will outpace cuts that were extended by OPEC and several non-OPEC nations in the first half of 2019. In Canada, volatility has subsided somewhat as crude curtailments mandated by the Alberta Government, along with incremental rail and seasonal factors have resulted in a significant decrease in crude inventories and a narrowing of the differential for all grades of Canadian crude.

While the crude curtailment program has reduced Canadian crude price volatility, it has not negated the need for incremental pipeline capacity out of the country. Looking forward, completion of any proposed pipeline expansion projects or increasing Canada's export capabilities by expanding capacity on existing lines will have a positive effect on the movement and pricing of Canadian barrels. In addition to pipelines, industry can utilize rail to ship crude. Incremental shipments by rail are expected to continue throughout 2019 and into 2020. While it is believed rail will help alleviate some backlog of oil and narrow the gap between Canadian and US prices, it is still insufficient to permanently offset the transportation restrictions caused by the lack of pipeline capacity.

The AECO benchmark price for natural gas continued to exhibit significant weakness through the third quarter of 2019 due to much lower seasonal demand and insufficient egress, either out of the basin or into storage, for the current level of supply. Pricing instability should ease moving into the 4th quarter of 2019, as weather-related demand begins to increase. Planned facility additions for the NGTL gas transmission system and a positive final investment decision by LNG Canada may improve sentiment towards western Canadian-based natural gas producers. While these projects do not impact near-term supply/demand imbalances, they do have positive implications for the longer term.

The following chart shows the Company's sensitivity to key commodity price variables. The sensitivity calculations are performed independently and show the effect of changing one variable while holding all other variables constant.

Annualized sensitivity analysis on cash flow, as estimated for 2019⁽¹⁾

Impact on cash flow	Change (\$)	\$000s	\$ per share ⁽²⁾
Realized crude oil price (\$/bbl)	1.00	2,830	0.08
Realized natural gas price (\$/mcf)	0.10	1,019	0.03
U.S.\$ to Canadian \$ exchange rate	0.01	1,500	0.04

⁽¹⁾ This analysis uses current royalty rates, annualized estimated average production of 12,600 BOE per day and no changes in working capital

⁽²⁾ Based on annualized basic weighted average shares outstanding of 33,388,796

Business Overview, Strategy and Key Performance Drivers

Bonterra continues to remain focused on long-term sustainability and improving its balance sheet through debt reduction. In the first nine months of 2019, the Company decreased net debt by \$20,872,000, or six percent, over net debt levels as at December 31, 2018. With a responsible capital allocation plan for 2019, Bonterra intends to continue managing production and debt levels to ensure the Company is well positioned for 2020.

To date in 2019, Bonterra has continued to develop its high quality, oil-weighted assets in the Pembina and Willesden Green Cardium pool of Alberta. For the first nine months of 2019, Bonterra invested approximately \$47,949,000 (representing 85 percent of the lower end of its \$57,000,000 to \$77,000,000 annual capital budget), of which \$41,470,000 was directed to drill and complete 26 gross (20.6 net) horizontal wells and tie-in 24 gross (18.6 net) wells. The remaining two wells were tied-in and placed on production early in October 2019. An additional \$6,479,000 was spent on related infrastructure costs, recompletions and other capital expenditures. The Company anticipates full year capital spending will be at the lower end of its 2019 annual capital guidance, which will include drilling 3 gross (3.0 net) wells in Q4 2019 that will be completed in Q1 2020.

Production averaged 12,136 BOE per day during Q3 2019. Approximately 526 BOE per day was off-line through the period due to facility turnarounds and preserving value by shutting-in low commodity price gas wells in British Columbia. The Company is currently producing approximately 12,750 BOE per day, or 5 percent higher than the Q3 2019 average, and expects average annual production to be approximately two percent lower than the 2019 guidance of 12,600 BOE per day to 13,200 BOE per day.

In response to mandatory production curtailments instituted by the Alberta Government in January 2019, differentials on Canadian sweet crude oil have narrowed significantly, and as a result, the Company benefitted from a stronger commodity price environment during the nine months ended September 30, 2019. As part of Bonterra's ongoing efforts to diversify crude oil pricing and to protect future cash flow, the Company entered into physical delivery sales and risk management contracts for the fourth quarter of 2019. During Q4 2019, the Company will receive fixed Edmonton Par prices on 2,500 bbls per day of crude oil in the month of October and 3,500 bbls per day of crude oil in the months of November and December. The fixed Edmonton Par prices range between \$62.90 CAD per bbl to \$68.69 CAD per bbl. The Company also diversified its natural gas pricing for the warmer months of 2020 by entering into a physical delivery sales contracts for 5,000 GJs per day from April 1, 2020 to October 31, 2020 ranging between \$1.55 CAD per GJ to \$1.64 CAD per GJ.

Bonterra's successful operations are dependent upon several factors including, but not limited to: commodity prices, efficient management of capital spending, the payment of monthly dividends, ability to maintain desired levels of production, control over infrastructure, efficiency in developing and operating properties, and the ability to control costs. The Company's key measures of performance with respect to these drivers include but are not limited to:

average daily production volumes, average realized prices, and average operating costs per unit of production. Disclosure of these key performance measures can be found in this MD&A and/or previous interim or annual MD&A disclosures.

Drilling

	Three months ended						Nine months ended			
	September 30,		June 30,		September 30,		September 30,		September 30,	
	2019		2019		2018		2019		2018	
	Gross ⁽¹⁾	Net ⁽²⁾								
Crude oil horizontal-operated	7	7.0	2	2.0	7	6.9	20	20.0	27	26.8
Crude oil horizontal-non-operated	5	0.5	-	-	3	0.6	6	0.6	5	0.8
Total	12	7.5	2	2.0	10	7.5	26	20.6	32	27.6
Success rate	100%		100%		100%		100%		100%	

⁽¹⁾ "Gross" wells are the number of wells in which Bonterra has a working interest.

⁽²⁾ "Net" wells are the aggregate number of wells obtained by multiplying each gross well by Bonterra's percentage of working interest.

During the first nine months of 2019, the Company drilled 20 gross (20.0 net) wells and completed 20 gross (20.0 net) wells, of which 18 gross (18.0 net) wells were tied-in and placed on production. The remaining two gross (2.0 net) wells commenced production in October 2019. The Company plans to drill 3 gross (3.0 net) wells in December that will be completed in Q1 2020.

In addition, six gross (0.6 net) non-operated wells were drilled, completed, equipped and placed on production during the first nine months of 2019.

Production

	Three months ended			Nine months ended	
	September 30,	June 30,	September 30,	September 30,	September 30,
	2019	2019	2018	2019	2018
Crude oil (barrels per day)	7,157	7,746	7,949	7,328	8,242
NGLs (barrels per day)	1,009	970	1,070	976	985
Natural gas (MCF per day)	23,820	23,750	24,144	23,836	24,719
Average BOE per day	12,136	12,674	13,043	12,277	13,347

The Company averaged 12,277 BOE per day for the first nine months of 2019, compared to 13,347 BOE per day for the same period in 2018, reflecting significantly reduced capital in 2019 compared to the comparable period in 2018, which led to fewer new wells coming on production. In addition, for the first nine months of 2019, an average of approximately 440 BOE per day of production was shut-in primarily due to facility turnarounds being undertaken on a large number of gas plants and batteries, as well as the voluntary shut-in of British Columbia natural gas wells due to low realized natural gas prices.

Third quarter 2019 production was lower than the previous quarter due to the timing of new wells being brought onto production, coupled with 580 BOE per day of production that was shut-in due to the reasons outlined above.

Cash Netback

The following table illustrates the calculation of the Company's cash netback from operations for the periods ended:

\$ per BOE	Three months ended			Nine months ended	
	September 30, 2019	June 30, 2019	September 30, 2018	September 30, 2019	September 30, 2018
Production volumes (BOE)	1,116,506	1,153,375	1,199,929	3,351,689	3,643,642
Gross production revenue	42.38	47.56	53.18	45.35	51.71
Royalties	(3.76)	(3.05)	(6.17)	(3.50)	(5.51)
Production costs	(14.32)	(15.88)	(16.31)	(15.03)	(14.58)
Field netback	24.30	28.63	30.70	26.82	31.62
General and administrative	(1.05)	(1.95)	(1.45)	(1.48)	(1.61)
Interest and other	(3.35)	(3.52)	(2.94)	(3.48)	(3.18)
Cash netback	19.90	23.16	26.31	21.86	26.83

Cash netbacks decreased in the first nine months of 2019 compared to 2018 primarily due to lower realized commodity prices and increased production costs per BOE, which were partially offset by a decrease in royalties per BOE.

Relative to Q2 2019, cash netbacks for Q3 2019 decreased due to lower realized commodity prices and a gas cost allowance recovery on natural gas crown royalties in the second quarter of 2019, which were partially offset by lower production costs per BOE.

Oil and Gas Sales

Revenue - oil and gas sales (\$ 000s)	Three months ended			Nine months ended	
	September 30, 2019	June 30, 2019	September 30, 2018	September 30, 2019	September 30, 2018
Crude oil	43,121	50,235	56,457	134,699	166,336
NGL	2,085	2,253	4,325	7,020	11,372
Natural gas	2,114	2,364	3,035	10,287	10,692
	47,320	54,852	63,817	152,006	188,400
Average realized prices:					
Crude oil (\$ per barrel)	65.49	71.27	77.20	67.33	73.93
NGLs (\$ per barrel)	22.45	25.53	43.95	26.34	42.28
Natural gas (\$ per MCF)	0.96	1.09	1.37	1.58	1.58
Average (\$ per BOE)	42.38	47.56	53.18	45.35	51.71
Average BOE per day	12,136	12,674	13,043	12,277	13,347

Revenue from oil and gas sales in the first nine months of 2019 decreased by \$36,394,000, or 19 percent, compared to the same period in 2018. The decrease in oil and gas sales was primarily driven by an eight percent decrease in production volumes and a decrease in commodity prices for oil and NGLs. The quarter-over-quarter decrease in oil and gas sales was primarily due to a decrease in crude oil prices and lower production volumes compared to Q2 2019.

The Company's product split on a revenue basis for 2019 is weighted approximately 93 percent to crude oil and NGLs.

Royalties

(\$ 000s)	Three months ended			Nine months ended	
	September 30, 2019	June 30, 2019	September 30, 2018	September 30, 2019	September 30, 2018
Crown royalties	2,563	1,683	4,784	6,450	12,681
Freehold, gross overriding and other royalties	1,632	1,832	2,616	5,274	7,411
Total royalties	4,195	3,515	7,400	11,724	20,092
Crown royalties - percentage of revenue	5.4	3.1	7.5	4.2	6.7
Freehold, gross overriding and other royalties - percentage of revenue	3.4	3.3	4.1	3.5	3.9
Royalties - percentage of revenue	8.8	6.4	11.6	7.7	10.6
Royalties \$ per BOE	3.76	3.05	6.17	3.50	5.51

Royalties paid by the Company consist of both crown royalties to the Provinces of Alberta, Saskatchewan and British Columbia and other royalties. Total royalties decreased by \$2.01 per BOE for the first nine months of 2019 compared to the same period in 2018. The decrease in royalties is primarily a result of lower commodity prices in 2019 than the prior year. The quarter-over-quarter increase in royalties of \$0.71 per BOE was primarily due to an annual gas cost allowance credit received in Q2 2019 offset by reduced royalties on gas and NGLs from lower commodity prices in Q3 2019 compared to Q2 2019.

Production Costs

(\$ 000s except \$ per BOE)	Three months ended			Nine months ended	
	September 30, 2019	June 30, 2019	September 30, 2018	September 30, 2019	September 30, 2018
Production costs	15,989	18,312	19,572	50,369	53,115
\$ per BOE	14.32	15.88	16.31	15.03	14.58

Production costs for the first nine months of 2019 decreased by \$2,746,000 compared to 2018 primarily due to decreased production, which was partially offset by higher trucking and power costs. The increased trucking and power costs combined with shut-in production caused operating costs on a BOE basis to increase by \$0.45 per BOE.

Production costs for Q3 2019 decreased by \$2,323,000 compared to Q2 2019 primarily due to less oil and water trucking from new well production, decreased power and maintenance costs.

Other Income

(\$ 000s)	Three months ended			Nine months ended	
	September 30, 2019	June 30, 2019	September 30, 2018	September 30, 2019	September 30, 2018
Investment income	11	21	21	43	48
Administrative income	25	30	39	80	133
Deferred consideration	301	304	332	927	1,060
Gain on sale of property	3	-	-	5	-
Unrealized loss on risk management contracts	(58)	-	-	(58)	-
	282	355	392	997	1,241

Deferred consideration relates to a deferred gain on the sale of a two percent overriding royalty interest, which is recognized into revenue using the same unit-of-production method as the encumbered property, plant and equipment assets.

The market value and carrying value of the investments held by the Company at September 30, 2019 was \$265,000 (September 30, 2018 - \$530,000). There were no dispositions during the nine months ended September 30, 2019 or

2018. Dispositions that result in a gain or loss on sale are recorded as an equity transfer between accumulated other comprehensive income and retained earnings.

The Company receives administrative income for various oil and gas administrative services and production equipment rentals.

During the third quarter, Bonterra entered into financial derivatives to minimize commodity price risk on crude oil sales. The financial derivatives outstanding are for the period from October 1, 2019 to December 31, 2019 on a total of 153,000 barrels of crude oil (approximately 1,000 barrels of oil per day for the month of October and 2,000 barrels of oil per day for the months of November and December) at fixed Edmonton Par prices ranging from \$62.90 to \$65.00 CAD per barrel. These contracts are not considered normal sales contracts and are recorded at fair value.

General and Administration (G&A) Expense

(\$ 000s except \$ per BOE)	Three months ended			Nine months ended	
	September 30, 2019	June 30, 2019	September 30, 2018	September 30, 2019	September 30, 2018
Employee compensation expense	987	1,119	1,202	3,202	3,937
Office and administrative expense	185	1,131	534	1,754	1,946
Total G&A expense	1,172	2,250	1,736	4,956	5,883
\$ per BOE	1.05	1.95	1.45	1.48	1.61

The decrease of \$735,000 in employee compensation expense for the first nine months of 2019 compared to 2018 is primarily due to a lower bonus accrual from decreased earnings before income taxes. The Company has a bonus plan in which the bonus pool consists of a range between 2.5 percent to 3.5 percent of earnings before income taxes.

Office and administrative expenses for the first nine months of 2019 decreased by \$192,000 compared to 2018 primarily due to a decrease in bank charges and the allowance for doubtful accounts expense. The decrease was partially offset by an increase in software and consulting services. The decrease in Q3 2019 over Q2 2019 was primarily due to decreased software costs, a reduction in the allowance for doubtful accounts expense and the bank renewal fees incurred in the second quarter.

Finance Costs

(\$ 000s except \$ per BOE)	Three months ended			Nine months ended	
	September 30, 2019	June 30, 2019	September 30, 2018	September 30, 2019	September 30, 2018
Interest on long-term debt	3,586	3,919	3,352	11,203	11,116
Other interest	194	192	230	579	666
Interest expense	3,780	4,111	3,582	11,782	11,782
\$ per BOE	3.39	3.56	2.99	3.52	3.23
Unwinding of the discounted value of decommissioning liabilities	731	747	789	2,221	2,307
Total finance costs	4,511	4,858	4,371	14,003	14,089

Interest on long-term debt increased in the first nine months of 2019 compared to the first nine months of 2018 due to increased interest rates as a result of a higher net debt to EBITDA ratio for Q4 2018 which was in effect during Q2 2019. Interest costs for the first nine months of 2019 was partially offset by lower average long-term debt outstanding of approximately \$3,387,000. Quarter-over-quarter interest on long-term debt decreased as a result of a lower net debt to EBITDA ratio in effect for the current quarter and reduced average long-term debt of \$6,562,000. The Company anticipates interest rates on long-term debt will decrease in Q4 2019 from an improved net debt to EBITDA ratio due to higher realized oil pricing compared to Q4 2018 and the Company's continued focus on debt repayment. Interest rates for the current quarter are determined based on the trailing quarter and calculated by taking the ratio of total debt (excluding accounts payable and accrued liabilities) to EBITDA (defined as net income excluding finance costs, provision for current and deferred taxes, depletion and depreciation, share-option compensation, gain or loss on sale of assets and impairment of assets) multiplied by four.

Other interest relates primarily to amounts paid to a related party (see related party transactions) and a \$7,500,000 subordinated promissory note from a private investor. For more information about the subordinated promissory note, refer to Note 5 of the September 30, 2019 condensed financial statements.

A one percent increase (decrease) in the Canadian prime rate would decrease (increase) both annual net earnings and comprehensive income by approximately \$2,172,000.

Share-Option Compensation

(\$ 000s)	Three months ended			Nine months ended	
	September 30, 2019	June 30, 2019	September 30, 2018	September 30, 2019	September 30, 2018
Share-option compensation	649	620	753	1,828	2,261

Share-option compensation is a statistically calculated value representing the estimated expense of issuing employee stock options. The Company records a compensation expense over the vesting period based on the fair value of options granted to directors, officers and employees.

Share-option compensation decreased by \$433,000 in the first nine months of 2019 compared to the same period a year ago. This decline is due to most of the options issued in 2017 (which were fully amortized in 2018) having higher share price volatility than the options issued in the fourth quarter of 2018 (which will be fully amortized in 2019).

Based on the outstanding options as of September 30, 2019, the Company has an unamortized expense of \$459,000, of which \$287,000 will be recorded for the remainder of 2019; \$126,000 for 2020; and \$46,000 thereafter. For more information about options issued and outstanding, refer to Note 8 of the September 30, 2019 condensed financial statements.

Depletion and Depreciation, Exploration and Evaluation (E&E) and Goodwill

(\$ 000s)	Three months ended			Nine months ended	
	September 30, 2019	June 30, 2019	September 30, 2018	September 30, 2019	September 30, 2018
Depletion and depreciation	22,973	21,865	22,288	66,143	68,264
Exploration and evaluation	-	-	-	-	291

The provision for depletion and depreciation decreased in the first nine months of 2019 compared to the same period in 2018 due to decreased production volumes.

The E&E expense for the nine months ended September 30, 2018 was related to expired leases.

There were no impairment provisions recorded for the three and nine month periods ended September 30, 2019 or 2018.

Taxes

The Company recorded a deferred income tax recovery of \$19,382,000 (2018 – \$7,570,000 expense). The deferred income tax recovery is due to a decrease in the Alberta corporate income tax rate from 12 percent to 8 percent by January 1, 2022.

For additional information regarding income taxes, see Note 7 of the September 30, 2019 condensed financial statements.

Net Earnings (Loss)

(\$ 000s except \$ per share)	Three months ended			Nine months ended	
	September 30, 2019	June 30, 2019	September 30, 2018	September 30, 2019	September 30, 2018
Net earnings (loss)	(1,276)	23,131	5,756	23,312	18,076
\$ per share - basic	(0.04)	0.69	0.17	0.70	0.54
\$ per share - diluted	(0.04)	0.69	0.17	0.70	0.54

Net earnings for the first nine months of 2019 increased by \$5,236,000 compared to 2018. The increase in net earnings was attributed to the deferred income tax recovery as a result of a decrease in the Alberta corporate income tax rate. In addition, royalties and depletion and depreciation were lower given the decrease in realized commodity prices and production, respectively. The increase in net earnings for the first nine months of 2019 was partially offset by a decrease in oil and gas sales.

The quarter-over-quarter decrease in net earnings was mainly due to a deferred income tax recovery provision recorded in Q2 2019, and the decrease in production and oil prices in Q3 2019 compared to the prior quarter.

Other Comprehensive Income (Loss)

Other comprehensive income for 2019 consists of an unrealized loss before tax on investments (including investment in a related party) of \$109,000 relating to a decrease in the investments' fair value (September 30, 2018 – unrealized loss of \$221,000). Realized gains decrease accumulated other comprehensive income as these gains are transferred to retained earnings. Other comprehensive income varies from net earnings by unrealized changes in the fair value of Bonterra's holdings of investments, including the investment in a related party, net of tax.

Cash Flow from Operations

(\$ 000s except \$ per share)	Three months ended			Nine months ended	
	September 30, 2019	June 30, 2019	September 30, 2018	September 30, 2019	September 30, 2018
Cash flow from operations	19,774	25,468	33,669	60,365	95,454
\$ per share - basic	0.59	0.76	1.01	1.81	2.87
\$ per share - diluted	0.59	0.76	1.01	1.81	2.87

In the first nine months of 2019, cash flow from operations decreased by \$35,089,000 compared to the same period a year ago. This was primarily due to a decrease in revenue from oil and gas sales.

The quarter-over-quarter decrease in cash flow of \$5,694,000 is also primarily due to a decrease in revenue from oil and gas sales.

Related Party Transactions

Bonterra holds 1,034,523 (December 31, 2018 – 1,034,523) common shares in Pine Cliff Energy Ltd. ("Pine Cliff") which represents less than one percent ownership in Pine Cliff's outstanding common shares. Pine Cliff's common shares had a fair market value as of September 30, 2019 of \$134,000 (December 31, 2018 – \$258,000). The Company provides marketing services for Pine Cliff. All services performed were charged at estimated fair value. As at September 30, 2019, the Company had an account receivable from Pine Cliff of \$21,000 (December 31, 2018 – \$71,000).

As at September 30, 2019, the Company's CEO, Chairman of the Board and major shareholder has loaned Bonterra \$12,000,000 (December 31, 2017 - \$12,000,000). The loan bears interest at Canadian chartered bank prime less 5/8th of one percent and has no set repayment terms but is payable on demand. Security under the debenture is over all the Company's assets and is subordinated to any and all claims in favour of the syndicate of senior lenders providing credit facilities to the Company. The Company's bank agreement requires that the above loan can only be repaid should the Company have sufficient available borrowing limits under the Company's credit facility. Interest paid on this loan for the first nine months of 2019 was \$298,000 (September 30, 2018 - \$261,000). This loan results in a benefit to Bonterra as the interest paid to the CEO by Bonterra is lower than bank interest.

Liquidity and Capital Resources

Net Debt to Cash Flow from Operations

Bonterra continues to focus on monitoring overall debt while managing its cash flow, capital expenditures and dividend payments. The Company's net debt to twelve-month trailing cash flow ratio as of September 30, 2019 was 4.5 to 1 times (versus 2.8 to 1 times at December 31, 2018). The higher net debt to cash flow ratio stems from a decrease in the twelve-month trailing cash flow. Compared to year end 2018, net debt decreased by \$20,872,000 in the first nine months of 2019 due to a stronger focus on debt reduction, a decrease in capital spending and reduced dividend payments compared to the prior period. The Company's primary focus remains on managing its bank debt during a period of highly volatile commodity prices. Bonterra will continue to assess its dividend and capital expenditures compared to cash flow from operations on a quarterly basis.

Working Capital Deficiency and Net debt

(\$ 000s)	September 30, 2019	June 30, 2019	December 31, 2018	September 30, 2018
Working capital deficiency	24,599	22,238	30,281	35,319
Long-term bank debt	283,470	288,545	298,660	293,197
Net Debt	308,069	310,783	328,941	328,516

The Company has sufficient availability on its credit facility to repay both the related party loan and the subordinated promissory note, if required. During each quarter, the Company manages net debt by monitoring capital spending and dividends paid relative to cash flow from operations.

Net debt is a combination of long-term bank debt and working capital. Net debt for September 30, 2019 decreased by \$20,447,000 compared to September 30, 2018 primarily due to higher realized crude oil prices, execution of a successful capital program and a reduction in the monthly dividend.

Working capital is calculated as current liabilities less current assets. The Company finances its working capital deficiency using cash flow from operations, its long-term bank facility, share issuances, option exercises and adjustments of dividend payments. Included in the working capital deficiency as at September 30, 2019 is \$19,500,000 of debt relating to the subordinated promissory note and the amount due to a related party.

Financial Risk Management

The Company has entered into physical delivery sales contracts to manage commodity risk. These contracts are considered normal sales contracts and are not recorded at fair value in the financial statements. During the third quarter of 2019, the Company also entered into risk management contracts to manage commodity risk. These contracts are not considered normal sales contracts and are recorded at fair value. For more information on physical delivery and risk management contracts in place see Note 10 of the September 30, 2019 condensed financial statements.

Capital Expenditures

During the nine months ended September 30, 2019, the Company incurred capital expenditures of \$47,949,000 (September 30, 2018 - \$73,952,000). Of the total capital invested, \$41,470,000 was directed to drilling and completing 26 gross (20.6 net) wells and tying-in 24 gross (18.6 net) wells. An additional \$6,479,000 was spent on related infrastructure costs, recompletions and other capital expenditures. The Company anticipates ending the year at the low end of its annual capital guidance of \$57,000,000 to \$77,000,000 for 2019.

Liability Management Ratio ("LMR") Update

In the first nine months of 2019, 95 percent of the Company's production was in the province of Alberta. The Company currently has an LMR rating of 1.89 in Alberta, which has decreased from the beginning of the year as lower drilling

activity has led to lower production volumes and a lower three-year average for crude oil pricing. Bonterra does not anticipate any regulatory impediments given its current LMR.

Long-term Debt

Long-term debt represents the outstanding draws on the Company's bank facility as described in the notes to the Company's audited annual financial statements. As of September 30, 2019, the Company has a bank facility with a limit of \$340,000,000 (December 31, 2018 - \$380,000,000) that is comprised of a \$300,000,000 syndicated revolving credit facility and a \$40,000,000 non-syndicated revolving credit facility which has an accordion feature allowing the Company to obtain future funding of up to \$40,000,000 for opportunities outside of normal operations, such as acquisitions, subject to unanimous lender approval. Amounts drawn under the bank facility of \$340,000,000 at September 30, 2019 totaled \$283,470,000 (December 31, 2018 - \$298,660,000), five percent lower than year-end 2018. The interest rates for the nine months ended September 30, 2019 on the Company's Canadian prime rate loan and Banker's Acceptances are between four to six percent. The loan is revolving to April 28, 2020 with a maturity date of April 29, 2021, subject to annual review. The credit facilities have no fixed terms of repayment.

The available lending limits of the credit facilities are reviewed semi-annually on or before April 30 and October 31 each year based mainly on the lender's assessment of the Company's reserves, future commodity prices and costs. Effective October 31, 2019, the total credit facility was revised to \$325,000,000, comprised of a \$286,765,000 syndicated revolving credit facility and a \$38,235,000 non-syndicated revolving credit facility. All other terms and conditions remain the same.

Advances drawn under the bank facility are secured by a fixed and floating charge debenture over the assets of the Company. In the event the bank facility is not extended or renewed, amounts drawn under the facility would be due and payable on the maturity date. The size of the committed credit facilities is based primarily on the value of the Company's producing petroleum and natural gas assets and related tangible assets as determined by the Lenders. For more information see Note 6 of the September 30, 2019 condensed financial statements.

Shareholders' Equity

The Company is authorized to issue an unlimited number of common shares without nominal or par value.

The Company is also authorized to issue an unlimited number of Class "A" redeemable Preferred Shares and an unlimited number of Class "B" Preferred Shares. There are currently no outstanding Class "A" redeemable Preferred Shares or Class "B" Preferred Shares.

	Number	Amount (\$ 000s)
Issued and fully paid - common shares		
Balance, September 30, 2019 and December 31, 2018	33,388,796	765,276

The Company provides a stock option plan for its directors, officers and employees. Under the plan, the Company may grant options for up to 3,338,880 (December 31, 2018 – 3,338,880) common shares. The exercise price of each option granted will not be lower than the market price of the common shares on the date of grant and the option's maximum term is five years. For additional information regarding options outstanding, see Note 8 of the September 30, 2019 condensed financial statements.

Dividend Policy

For the three months ended September 30, 2019, the Company declared and paid dividends of \$1,002,000 (\$0.03 per share) (September 30, 2018 – \$9,994,000) (\$0.30 per share). For the nine months ended September 30, 2019 the Company declared and paid dividends of \$3,005,000 (\$0.09 per share) (September 30, 2018 - \$29,980,000 (\$0.90 per share)). Bonterra's dividend policy is regularly monitored and is dependent upon production, commodity prices, cash flow from operations, debt levels and capital expenditures. Bonterra's dividend payout ratio based on cash flow from operations was five percent for the nine months ended September 30, 2019 (31 percent for the nine months ended September 30, 2018).

Bonterra's capital spending and dividends to its shareholders are funded by cash flow from operating activities with the remaining free cash flow directed to debt repayment. To the extent that the excess cash flow from operations after dividends and capital spending is not sufficient, the shortfall may be funded by drawdowns on Bonterra's bank facility. Bonterra intends to provide dividends to shareholders that are sustainable by the Company while giving consideration to its liquidity and long-term operational strategy. The level of dividends is highly dependent upon cash flow generated from operations, which may fluctuate significantly due to changes in financial and operational performance, commodity prices, interest and exchange rates and many other factors. As such, future dividends cannot be assured.

Quarterly Financial Information

	2019				2018			
For the periods ended (\$ 000s except \$ per share)	Q3	Q2	Q1	Q4	Q3	Q2	Q1

Per share - diluted	0.06	(0.09)	0.09	0.01

The fluctuations in the Company's revenue and net earnings from quarter-to-quarter are caused by variations in production volumes, realized commodity pricing and the related impact on royalties, production, G&A and finance costs. In the fourth quarter of 2018, the Canadian oil and gas industry realized a significant decrease in realized commodity prices for crude oil, which negatively impacted Q4 2018 net earnings and cash flow, as well as Q1 2019 cash flow. Net earnings for Q2 2019 increased due to a deferred tax recovery from a decrease in the Alberta corporate income tax rate.

Critical Accounting Estimates

There have been no changes to the Company's critical accounting policies and estimates as of the period ended in the financial statements.

Forward-Looking Information

Certain statements contained in this MD&A include statements which contain words such as "anticipate", "could", "should", "expect", "seek", "may", "intend", "likely", "will", "believe" and similar expressions, relating to matters that are not historical facts, and such statements of our beliefs, intentions and expectations about development, results and events which will or may occur in the future, constitute "forward-looking information" within the meaning of applicable Canadian securities legislation and are based on certain assumptions and analysis made by us derived from our experience and perceptions. Forward-looking information in this MD&A includes, but is not limited to: expected cash provided by continuing operations; cash dividends; future capital expenditures, including the amount and nature thereof; oil and natural gas prices and demand; expansion and other development trends of the oil and gas industry; business strategy and outlook; expansion and growth of our business and operations; and maintenance of existing customer, supplier and partner relationships; supply channels; accounting policies; credit risks; and other such matters.

All such forward-looking information is based on certain assumptions and analyses made by us in light of our experience and perception of historical trends, current conditions and expected future developments, as well as other factors we believe are appropriate in the circumstances. The risks, uncertainties, and assumptions are difficult to predict and may affect operations, and may include, without limitation: foreign exchange fluctuations; equipment and labour shortages and inflationary costs; general economic conditions; industry conditions; changes in applicable environmental, taxation and other laws and regulations as well as how such laws and regulations are interpreted and enforced; the ability of oil and natural gas companies to raise capital; the effect of weather conditions on operations and facilities; the existence of operating risks; volatility of oil and natural gas prices; oil and gas product supply and demand; risks inherent in the ability to generate sufficient cash flow from operations to meet current and future obligations; increased competition; stock market volatility; opportunities available to or pursued by us; and other factors, many of which are beyond our control. The foregoing factors are not exhaustive.

Actual results, performance or achievements could differ materially from those expressed in, or implied by, this forward-looking information and, accordingly, no assurance can be given that any of the events anticipated by the forward-looking information will transpire or occur, or if any of them do, what benefits will be derived therefrom. Except as required by law, Bonterra disclaims any intention or obligation to update or revise any forward-looking information, whether as a result of new information, future events or otherwise.

The forward-looking information contained herein is expressly qualified by this cautionary statement.

Internal Controls Over Financial Reporting

The Company is required to comply with National Instrument 52-109 “Certification of Disclosure in Issuers’ Annual and Interim Filings.” The certification of interim filings for the interim period ended September 30, 2019 requires that Bonterra disclose in the interim MD&A any changes in the Company’s internal control over financial reporting that occurred during the period that have materially affected, or are reasonably likely to materially affect, the Company’s internal control over financial reporting. Bonterra confirms that no such changes were made to its internal controls over financial reporting during the nine months ended September 30, 2019.

Additional information relating to the Company may be found on www.sedar.com or visit our website at www.bonterraenergy.com.

MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL STATEMENTS

The information provided in this report, including the financial statements, is the responsibility of management. The timely preparation of the financial statements requires that management make estimates and use judgment regarding the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities as at the date of the financial statements and the reported amounts of revenues and expenses during the period. Such estimates primarily relate to unsettled transactions and events as at the date of the financial statements. Accordingly, actual results may differ from estimated amounts as future confirming events occur. Management believes such estimates have been based on careful judgments and have been properly reflected in the accompanying financial statements.

Management maintains a system of internal controls to provide reasonable assurance that the Company's assets are safeguarded and to facilitate the preparation of relevant and timely information.

The audit committee has reviewed these condensed financial statements with management and has reported to the Board of Directors. The Board of Directors has approved the financial statements as presented in this interim report.

⁽²⁾ Accumulated other comprehensive income is comprised of unrealized gains and losses on available-for-sale investments.

See accompanying notes to these condensed financial statements.

NOTES TO THE CONDENSED FINANCIAL STATEMENTS

As at September 30, 2019 and December 31, 2018 and for the three and nine months ended September 30, 2019 and September 30, 2018. (unaudited)

1. NATURE OF BUSINESS AND SEGMENT INFORMATION

Bonterra Energy Corp. (“Bonterra” or the “Company”) is a public company listed on the Toronto Stock Exchange (the “TSX”) and incorporated under the Canada Business Corporations Act. The address of the Company’s registered office is Suite 901, 1015-4th Street SW, Calgary, Alberta, Canada, T2R 1J4.

Bonterra operates in one industry and has only one reportable segment being the development and production of oil and natural gas in the western Canadian Sedimentary Basin.

The financial statements were authorized for issue by the Company’s Board of Directors on November 6, 2019.

2. BASIS OF PREPARATION

a) Statement of Compliance

The Company prepares its unaudited condensed financial statements in accordance with International Accounting Standard 34 – Interim Financial Reporting (IAS 34).

The accounting policies and method of computation followed in the preparation of the condensed financial statements are the same as those followed in the preparation of Bonterra’s 2018 audited annual financial statements, except for as denoted below. These condensed financial statements do not include all of the information required for annual financial statements and should be read in conjunction with the 2018 audited annual financial statements, which has been prepared in accordance with International Financial Reporting Standards (IFRS).

b) Adopted Accounting Pronouncements

IFRS 16 “Leases”

As of January 1, 2019, the Company adopted IFRS 16 which replaces sections IAS 17 “Leases”, IFRIC 4 “Determining whether an arrangement contains a lease”, SIC-15 “Operating leases – incentives” and SIC-27 “Evaluating the substance of transactions involving the legal form of a lease”. IFRS 16 introduces a single lease accounting model for lessees which requires the recognition of a right of use asset (“ROU”) and a lease liability on the statement of financial position for contracts that are, or contain, a lease.

The Company adopted IFRS 16 using the modified retrospective approach. Under this method of adoption, the ROUs recognized were measured at amounts equal to the present value of the lease obligations. The modified retrospective approach does not require restatement of prior period financial information as it recognizes the cumulative effect of IFRS 16 as an adjustment to opening retained earnings and applies the standard prospectively. The Company elected not to apply lease accounting to certain leases for which the lease term ends within 12 months of the date of initial adoption. The Company undertook a complete evaluation of the contracts it has entered into, and it was determined that there is no material impact as a result of adopting IFRS 16. In addition, as a result of this adoption, the Company has included an accounting policy for leases as follows:

Leases

Leases or contractual obligations are capitalized as ROUs with a corresponding right of use lease obligation using the present value of future lease payments on the statement of financial position. The discount rate used to determine the ROU is disclosed in the lease contract or the Company’s incremental borrowing rate, if none is provided. Certain lease payments will continue to be expensed in the statement of comprehensive income. These leases are contractual

obligations that contain any of the following: are equal to or less than twelve months; are for oil and gas extraction; are variable payments; the Company does not control the asset; or no asset is identified in the lease.

IFRS 3 "Business Combinations"

The Company elected to early adopt the amendments to IFRS 3 "Business Combinations" effective January 1, 2019, which will be applied prospectively to acquisitions that occur on or after January 1, 2019. The amendments introduce an optional concentration test, narrow the definitions of a business and outputs, and clarify that an acquired set of activities and assets must include an input and a substantive process that together significantly contribute to the ability to create outputs. These amendments do not result in changes to the Company's accounting policies for applying the acquisition method.

3. PROPERTY, PLANT AND EQUIPMENT

Cost (\$ 000s)	Oil and gas properties	Production facilities	Furniture fixtures & other equipment	Total property plant & equipment
Balance at December 31, 2018	1,382,661	342,048	2,285	1,726,994
Additions	34,982	12,935	32	47,949
Adjustment to decommissioning liabilities ⁽¹⁾	34,336	-	-	34,336
Disposal	-	-	(84)	(84)
Balance at September 30, 2019	1,451,979	354,983	2,233	1,809,195
Accumulated depletion and depreciation (\$ 000s)	Oil and gas properties	Production facilities	Furniture fixtures & other equipment	Total property plant & equipment
Balance at December 31, 2018	(604,502)	(134,927)	(1,792)	(741,221)
Depletion and depreciation	(54,213)	(11,876)	(54)	(66,143)
Disposal and other	(22)	-	79	57
Balance at September 30, 2019	(658,737)	(146,803)	(1,767)	(807,307)
Carrying amounts as at: (\$ 000s)				
December 31, 2018	778,159	207,121	493	985,773
September 30, 2019	793,242	208,180	466	1,001,888

⁽¹⁾ Adjustment to decommissioning liabilities is due to a 0.57 percent decrease in the risk-free rate and a change in estimate on decommissioning costs.

There were no impairment losses or reversals recorded in the statement of comprehensive income for the nine months ended September 30, 2019 and 2018.

4. TRANSACTIONS WITH RELATED PARTIES

As at September 30, 2019, the Company's CEO, Chairman of the Board and major shareholder has loaned Bonterra \$12,000,000 (December 31, 2018 - \$12,000,000). The loan bears interest at Canadian chartered bank prime less 5/8th of one percent and has no set repayment terms but is payable on demand. Security under the debenture is over all of the Company's assets and is subordinated to any and all claims in favour of the syndicate of senior lenders providing credit facilities to the Company. The Company's bank agreement requires that the above loan can only be repaid should the Company have sufficient available borrowing limits under the Company's credit facility. Interest paid on this loan during the first September months of 2019 was \$298,000 (September 30, 2018 - \$261,000).

The Company provides executive and marketing services for Pine Cliff Energy Ltd. (Pine Cliff). All services performed were charged at estimated fair value. As at September 30, 2019, the Company had an account receivable from Pine Cliff of \$21,000 (December 31, 2018 - \$71,000).

5. SUBORDINATED PROMISSORY NOTE

As at September 30, 2019, Bonterra had \$7,500,000 (December 31, 2018 - \$10,000,000) outstanding on a subordinated note to a private investor. The terms of the subordinated promissory note are that it bears interest at five percent and is repayable after thirty days' written notice by either party. Security consists of a floating demand debenture over all of the Company's assets and is subordinated to any and all claims in favor of the syndicate of senior lenders providing credit facilities to the Company. Interest paid on the subordinated promissory note during the first nine months of 2019 was \$280,000 (September 30, 2018 - \$388,000). On January 2, 2019 the Company repaid \$2,500,000.

The Company's bank agreement requires that the above loan can only be repaid should the Company have sufficient available borrowing limits under the Company's credit facility.

6. BANK DEBT

As at September 30, 2019, the Company has a total bank facility of \$340,000,000 (December 31, 2018 - \$380,000,000), comprised of a \$300,000,000 syndicated revolving credit facility and a \$40,000,000 non-syndicated revolving credit facility. The amount drawn under the total bank facility at September 30, 2019 was \$283,000,000 (December 31, 2018 - \$298,660,000). The amounts borrowed under the bank facility bear interest at a floating rate based on the applicable Canadian prime rate or Banker's Acceptance rate, plus between 0.50 percent and 3.50 percent, depending on the type of borrowing and the Company's consolidated debt to EBITDA ratio. EBITDA is defined as net income for the period excluding finance costs, provision for current and deferred taxes, depletion and depreciation, share-option compensation, gain or loss on sale of assets and impairment of assets. The terms of the bank facility provide that the loan is revolving to April 28, 2020, with a maturity date of April 29, 2021, subject to annual review. The credit facilities have no fixed terms of repayment. The Company has an accordion feature which allows it to obtain future funding of up to \$40,000,000 for opportunities outside of normal operations, such as acquisitions, subject to unanimous lender approval.

The available lending limit of the bank facility is reviewed semi-annually on or before April 30 and October 31 and is based on the lender's assessment of the Company's reserves, future commodity prices and costs. Effective October 31, 2019, the total credit facility was revised to \$325,000,000, comprised of a \$286,765,000 syndicated revolving credit facility and a \$38,235,000 non-syndicated revolving credit facility. All other terms and conditions remain the same.

The amount available for borrowing under the bank facility is reduced by outstanding letters of credit. Letters of credit totaling \$900,000 were issued as at September 30, 2019 (December 31, 2018 - \$900,000). Security for the bank facility consists of various floating demand debentures totaling \$750,000,000 (December 31, 2018 - \$750,000,000) over all of the Company's assets and a general security agreement with first ranking over all personal and real property.

The following is a list of the material financial covenants on the bank facility:

- The Company cannot exceed \$340,000,000 in consolidated debt (excluding accounts payable and accrued liabilities). As at September 30, 2019 consolidated debt is \$302,970,000.
- Dividends paid in the current quarter shall not exceed 80 percent of the available cash flow for the preceding four fiscal quarters divided by four, which is calculated as five percent for the current quarter.

Available cash flow is defined to be cash provided by operating activities excluding the change in non-cash working capital and decommissioning liabilities settled and including investment income received and all net proceeds of dispositions included in cash used in investing activities. As at September 30, 2019, the Company is in compliance with all covenants.

7. INCOME TAXES

Income tax expense varies from the amounts that would be computed by applying Canadian federal and provincial income tax rates as follows:

(\$ 000s)	Three Months		Nine Months	
	September 30, 2019	September 30, 2018	September 30, 2019	September 30, 2018
Earnings (loss) before taxes	(1,887)	8,089	3,980	25,646
Combined federal and provincial income tax rates	26.00%	27.00%	26.67%	27.00%
Income tax provision calculated using statutory tax rates	(491)	2,184	1,061	6,924
Increase (decrease) in taxes resulting from:				
Change in statutory tax rates ⁽¹⁾	-	-	(18,946)	-
Share-option compensation	169	203	488	610
Change in unrecorded benefits of tax pools	-	-	(1,569)	-
Change in estimates and other	(289)	(54)	(366)	36
	(611)	2,333	(19,332)	7,570

⁽¹⁾ Effective July 1, 2019 the combined federal and provincial income tax rate for Bonterra is approximately 26.00% due to the provincial tax rate for Alberta, Canada decreasing from 12% to 11%. The provincial tax rate for Alberta will further decrease to 10% on January 1, 2020, 9% on January 1, 2021 and 8% on January 1, 2022.

The Company has the following tax pools, which may be used to reduce taxable income in future years, limited to the applicable rates of utilization:

(\$ 000s)	Rate of Utilization (%)	Amount
Undepreciated capital costs	7-100	81,044
Share issue costs	20	5
Canadian oil and gas property expenditures	10	86,883
Canadian development expenditures	30	139,614
Canadian exploration expenditures	100	8,587
Federal income tax losses carried forward ⁽¹⁾	100	40,715
Provincial income tax losses carried forward ⁽²⁾	100	2,299
		359,147

⁽¹⁾ Federal income tax losses carried forward expire in the following years; 2035 - \$4,653,000; 2036 - \$35,853,000; 2037 - \$209,000.

⁽²⁾ Provincial income tax losses carried forward expire in 2036 - \$ 2,090,000; 2037 - \$209,000.

The Company has \$8,861,000 (December 31, 2018 - \$8,861,000) of investment tax credits that expire in the following years: 2024 - \$1,319,000; 2025 - \$2,258,000; 2026 - \$2,405,000; 2027- \$2,009,000; 2028 - \$745,000; 2034 - \$99,000; and 2037 - \$26,000

The Company has \$65,015,000 (December 31, 2018 - \$65,015,000) of capital losses carried forward which can only be claimed against taxable capital gains.

8. SHAREHOLDERS' EQUITY

Authorized

The Company is authorized to issue an unlimited number of common shares without nominal or par value.

	Number	Amount (\$ 000s)
Issued and fully paid - common shares		
Balance, September 30, 2019 and December 31, 2018	33,388,796	765,276

The Company is authorized to issue an unlimited number of Class “A” redeemable Preferred Shares and an unlimited number of Class “B” Preferred Shares. There are currently no outstanding Class “A” redeemable Preferred Shares or Class “B” Preferred Shares.

The weighted average common shares used to calculate basic and diluted net earnings per share for the nine months ended September 30 is as follows:

	Three Months		Nine Months	
	September 30, 2019	September 30, 2018	September 30, 2019	September 30, 2018
Basic shares outstanding	33,388,796	33,312,155	33,388,796	33,311,254
Dilutive effect of share options ⁽¹⁾	-	273,234	-	40,282
Diluted shares outstanding	33,388,796	33,585,389	33,388,796	33,351,536

⁽¹⁾ The Company did not include 2,760,000 share-options for the three months ended September 30, 2019 (September 30, 2018 – 1,593,000) and 2,760,000 share options for the nine months ended September 30, 2019 (September 30, 2018 – 1,826,000) in the dilutive effect of share-options calculations as these share-options were anti-dilutive.

For the three months ended September 30, 2019, the Company declared and paid dividends of \$1,002,000 (\$0.03 per share) (September 30, 2018 - \$9,994,000 (\$0.30 per share)). For the nine months ended September 30, 2019, the Company declared and paid dividends of \$3,005,000 (\$0.09 per share) (September 30, 2018 - \$29,980,000 (\$0.90 per share)).

The Company provides an equity settled option plan for its directors, officers and employees. Under the plan, the Company may grant options for up to 3,338,880 (December 31, 2018 – 3,338,880 common shares). The exercise price of each option granted cannot be lower than the market price of the common shares on the date of grant and the option’s maximum term is five years.

A summary of the status of the Company’s stock options as of September 30, 2019 and changes during the year ended are presented below:

	Number of options	Weighted average exercise price
At December 31, 2018	2,794,000	\$11.62
Options granted	60,000	5.79
Options forfeited	(78,000)	11.24
Options expired	(16,000)	27.95
At September 30, 2019	2,760,000	\$11.40

The following table summarizes information about options outstanding and exercisable as at September 30, 2019:

Range of exercise prices	Options outstanding			Options exercisable		
	Number outstanding	Weighted-average remaining contractual life	Weighted- average exercise price	Number exercisable	Weighted- average exercise price	
\$ 5.00 - \$ 10.00	1,061,000	1.4 years	\$ 5.92	-	\$ -	-
10.01 - 15.00	1,583,000	0.6 years	14.56	753,000	14.56	
15.01 - 25.00	116,000	1.0 years	18.56	53,000	18.49	
\$ 5.00 - \$ 25.00	2,760,000	0.9 years	\$ 11.40	806,000	\$ 14.82	

The Company records compensation expense over the vesting period, which ranges between one to three years, based on the fair value of options granted to directors, officers and employees. During the nine months ended September 30, 2019, the Company granted 60,000 options with an estimated fair value of \$86,000 or \$1.43 per option using the Black-Scholes option pricing model with the following key assumptions:

September 30, 2019

Weighted-average risk free interest rate (%) ⁽¹⁾	1.62
Weighted-average expected life (years)	2.0
Weighted-average volatility (%) ⁽²⁾	49.06
Forfeiture rate (%)	7.37
Weighted average dividend yield (%)	2.05

⁽¹⁾ Risk-free interest rate is based on the weighted average Government of Canada benchmark bond yields for one, two, and three year terms to match corresponding vesting periods.

⁽²⁾ The expected volatility is measured as the standard deviation of expected share price returns based on statistical analysis of historical weekly share prices for a representative period.

9. OIL AND GAS SALES, NET OF ROYALTIES

(\$ 000s)	Three months		Nine months	
	September 30, 2019	September 30, 2018	September 30, 2019	September 30, 2018
Oil and gas sales				
Crude oil	43,121	56,457	134,699	166,336
Natural gas liquids	2,085	4,325	7,020	11,372
Natural gas	2,114	3,035	10,287	10,692
	47,320	63,817	152,006	188,400
Less royalties:				
Crown	(2,563)	(4,784)	(6,450)	(12,681)
Freehold, gross overriding royalties and other	(1,632)	(2,616)	(5,274)	(7,411)
	(4,195)	(7,400)	(11,724)	(20,092)
Oil and gas sales, net of royalties	43,125	56,417	140,282	168,308

10. FINANCIAL RISK MANAGEMENT

The Company is exposed to credit risk, liquidity risk and market risk as part of its normal course of business. The Company's overall risk management program seeks to mitigate these risks and reduce the volatility on the Company's financial performance. Financial risk is managed by senior management under the direction of the Board of Directors. Bonterra's exposure to credit risk, liquidity risk and market risk are consistent with those discussed in Note 20 of the Company's audited annual financial statements for the year ended December 31, 2018.

Physical Delivery Sales Contracts

Bonterra enters into physical delivery sales contracts to manage commodity price risk. These contracts are considered normal executory sales contracts and are not recorded at fair value in the financial statements. As of September 30, 2019, the Company has the following physical delivery sales contracts in place.

Product	Type of contract	Volume	Term	Contract price
Oil	Fixed price - MSW Stream index ⁽¹⁾	1,000 BBL/day	Sept 1 to Dec 31, 2019	\$67.75 CAD/BBL
Oil	Fixed price - MSW Stream index ⁽¹⁾	500 BBL/day	Oct 1 to Oct 31, 2019	\$68.69 CAD/BBL
Oil	Fixed price - MSW Stream index ⁽¹⁾	500 BBL/day	Nov 1 to Nov 30, 2019	\$65.62 CAD/BBL
Oil	Fixed price - MSW Stream index ⁽¹⁾	500 BBL/day	Dec 1 to Dec 31, 2019	\$64.96 CAD/BBL

⁽¹⁾ "MSW Stream index" or "Edmonton Par" refers to the mixed sweet blend that is the benchmark price for conventionally produced light sweet crude oil in Western Canada.

Subsequent to September 30, 2019, the Company entered into the following physical delivery sales contracts.

Product	Type of contract	Volume	Term	Contract price
Gas	Fixed Price - AECO ⁽¹⁾	2,500 GJ/day	Apr 1 to Oct 31, 2020	\$1.55 CAD/GJ
Gas	Fixed Price - AECO ⁽¹⁾	2,500 GJ/day	Apr 1 to Oct 31, 2020	\$1.64 CAD/GJ

⁽¹⁾ "AECO" refers to Alberta Energy Company; a grade or heating content of natural gas used as benchmark pricing in Alberta, Canada.

Risk Management Contracts

As of September 30, 2019, the Company has the following financial risk management contracts in place.

Product	Type of contract	Volume	Term	Contract price
Oil	Financial Hedge - MSW Stream index	500 BBL/day	Oct 1 to Dec 31, 2019	\$63.00 CAD/BBL
Oil	Financial Hedge - MSW Stream index	500 BBL/day	Oct 1 to Dec 31, 2019	\$65.00 CAD/BBL

On October 31, 2019, the Company also entered into a financial derivative for the period of November 1, 2019 to December 31, 2019 for a total of 61,000 barrels of oil (approximately 1,000 barrels of oil per day) at a fixed MSW stream index price of \$62.90 CAD per barrel.

11. SUBSEQUENT EVENTS

Dividends

Subsequent to September 30, 2019, the Company declared the following dividends:

Date declared	Record date	\$ per share	Date payable
October 1, 2019	October 15, 2019	0.01	October 31, 2019
November 1, 2019	November 15, 2019	0.01	November 29, 2019
